Dear Public Service Commission,

Please don't approve RMP's request to levy a fee on individuals who have installed PV equipment. We (you, me, the community) should be doing all we can to ENCOURAGE expanded use of PV panels.

Today, when we are acutely aware of the pollution and associated consequences, we should not be discouraging the use of those technologies that help mitigate the problem. Please be part of the solution and help find additional ways to support and encourage the use of renewable energy.

Mark Holt
